Geologic Materials Center - Seismic and Well Data

Click on the map at the upper left and zoom in to your area of interest. Click on the well, line or polygon you are interested in including the 'click here for more information' and details about the data and what volumes are available. Sample lines can be viewed here. You can also scroll down on this same page to see a listing of available data and prices (use 'Purchase' drop-down). Free items can be downloaded directly.

Additional links below are related to data of varying types available thru the State of Alaska. You might know this stuff but this might save you some time or make you aware of something you did not previously know about.

SALSA can be viewed or downloaded

from http://dog.dnr.alaska.gov/documents/resourceevaluation/salsa/salsa_for_public_jul18_final-live.pdf SALSA was an outreach project used in outreach to promote some blocks of acreage included in the latest Fall areawide sales for the N. Slope and Beaufort Sea. It serves as a good case history for locating and using public data. Most of the data is free. The SALSA program has run its course but can still be a useful case study on how to locate data in Alaska.

For a distilled new version please see Locating O&G Data in Alaska 2020:

[http://dog.dnr.alaska.gov/Documents/Programs/Locating O&G Data in Alaska 2020.pdf](http://dog.dnr.alaska.gov/Documents/Programs/Locating_O&G_Data_in_Alaska_2020.pdf)

Most current activity maps, Notification Lessee Maps, Lease Sale Maps at:

<http://dog.dnr.alaska.gov/Information/MapsAndGis>

What is happening on the North Slope and Cook Inlet (separate maps). These are periodically updated.

Most current Tax Credit Maps at:

<http://dog.dnr.alaska.gov/Information/GeologicalAndGeophysicalData>

Maps show what is available and what will come available in the future with an estimate of when data is likely to be released
