STATE PIPELINE COORDINATOR'S SECTION

NOTICE OF CHANGE OF SERVICE
OLIKTOK PIPELINE RIGHT-OF-WAY LEASE – ADL 411731

The State Pipeline Coordinator's Section (SPCS) of the Department of Natural Resources (DNR), Division of Oil and Gas, received an application from Oliktok Pipeline Company (Lessee) requesting an authorization for a change of service and restart of the Oliktok Pipeline (Pipeline). On December 16, 2013, the SPCS authorized the Pipeline to provide common carrier service to transport natural gas; the Lessee is now requesting to convert the Pipeline use to transport natural gas liquids (NGLs). The proposed change of service will not require any additional acreage for the Oliktok Pipeline Right-of-Way Lease, ADL 411731. The application and supporting documents are available online: <http://dog.dnr.alaska.gov/Home/Newsroom>. The public may obtain hard copies of the letter of application and supporting documents, at cost, from the SPCS.

Pursuant to Alaska Statute 38.35.015, DNR approved the conversion of the Pipeline to transport natural gas and issued the Right-of-Way Lease on June 1, 1986. The Pipeline is a 16-inch diameter, approximately 28-mile pipeline originating near Pump Station 1 and terminating at Central Processing Facility 1 within the Kuparuk River Unit. Startup of the natural gas liquids service, as early as August 1, 2018, will allow the Lessee to meet a request from shippers.

Section 1(c) of the lease requires DNR approval for the pipeline to transport other products. The State Pipeline Coordinator, under authority delegated by the DNR Commissioner, intends to approve the request to transport natural gas liquids. All comments must be submitted in writing to the address below by 5:00 p.m. on April 26, 2018.
