## INTRODUCTION

Oil and gas lease sales are the initial step in a process that generates nearly 80 percent of the state's income. The legislature has found that "the people of Alaska have an interest in the development of the state's oil and gas resources" and has specified in AS 38.05.180 that the Commissioner of the Department of Natural Resources (DNR) prepare a five-year proposed oil and gas leasing program. The program is updated every January and is available on the Division of Oil and Gas website. This document presents DNR's proposed lease sales for 2002 through 2006.

The Five-Year Oil and Gas Leasing Program provides a stable and predictable schedule of proposed lease sales, which, if held, could result in the further development of Alaska's petroleum resources. The petroleum industry has come to rely on this program to plan for exploration and development expenditures. Business and labor use the program to prepare for the resultant economic opportunities.

Although the primary purpose of leasing state lands is to provide for oil and gas development and the subsequent economic benefits<sup>1</sup>, the program in itself has been a significant revenue source. During 2001 334 lease tracts were sold in four sales, resulting in \$26.5 million in bonus bid income to the state. A report on the results of these sales begins on page 33.

All lease sales since 1959 are listed in " Summary of State Competitive Lease Sales" (page 63). A brief description of lands included in each sale is found in "State Competitive Sale Areas"(page 66).

**Sale Areas:** A total of 20 lease sales are scheduled over the next five years – 10 on the North Slope, 5 in Cook Inlet and 5 in the Beaufort Sea. Fact sheets and maps describing these proposed sale areas begin on page 22.

---

<sup>1</sup> As a result of oil and gas revenue from bonus bids, rentals, and royalty payments (including federal shares), and settlements during Fiscal Year 2001 approximately \$798.8 million were deposited into the General Fund, \$331.4 million into the Permanent Fund, \$10 million into the Constitutional Budget Reserve Fund, and \$5.7 million into the School Fund.

## AREAWIDE LEASING

To achieve stability and predictability in the leasing program, and in response to industry's request for more frequent sales, the state has implemented annual areawide leasing. Under areawide leasing the state intends to annually offer for lease all available state acreage within the North Slope, Beaufort Sea and Cook Inlet areas. Conducting annual areawide sales will allow companies to fiscally plan for and develop their exploration strategies and budgets years in advance. The result will be more efficient exploration, leading to earlier development. The state's first areawide sale was conducted on the North Slope in June 1998.

### Administrative Process

Areawide leasing necessitated changes to DNR's administrative process prior to and following a sale. Previously, industry was asked to nominate areas to include in a sale, and DNR sought public comment on the proposed sale areas being considered for addition to the program. Since areawide leasing includes all available state acreage within each geographic region, there is no longer a need for industry nominations. Additionally, since the sale area within each region remains the same, it is no longer necessary to solicit public comment on the inclusion of these lands prior to issuing the five-year schedule. Prior to each scheduled sale, however, the public is given an opportunity to comment.

DNR has divided each sale area into tracts that will remain fixed for future sales. Because of the large number of tracts involved, the extent of the state's ownership interest in these tracts is no longer determined prior to a sale. Instead, following a sale, DNR verifies title only for the acreage within tracts that are leased. Therefore, should a potential bidder require title or land status information for a particular tract prior to the sale, it is the bidder's responsibility to obtain that information from DNR's public records. Land records are maintained at the department's Public Information Center, located in Suite 1260 at 550 West 7<sup>th</sup> Ave., Anchorage [(907) 269-8400]. A tract may contain land that the state cannot legally lease (i.e., part of an existing lease; federal, Native or private land; etc.). DNR assigns an acreage figure to each tract, which in many cases will be higher than the actual acreage available, and the bonus bid must reflect that assigned acreage. Once title has been verified, bids will be adjusted to reflect the actual acreage and the lease will be issued. Depending upon the number of tracts involved and the complexity of the land holdings, it could take several months following the lease sale before all of the leases are conveyed.

The lease sale consists of a public opening and reading of sealed bids received by DNR. The highest qualified bidder on a tract is awarded that lease.

### Best Interest Finding Process

To facilitate areawide leasing, in 1996 the Alaska State Legislature passed legislation establishing that a best interest finding developed for a lease sale would be valid for ten years. Previously, a finding was good for only five years. Once a finding for an area is written, DNR can conduct lease sales in that area for ten years, without having to repeat the entire process. Even though the public process for individual sales is different, depending on whether a finding is required or whether the sale is conditioned upon a previous finding, areawide leasing still provides opportunity for public input each year.

**A Finding is Required:** The planning and execution of an oil and gas lease sale that requires a best interest finding is a lengthy process beginning years before a sale, and it involves the participation of a

number of state agencies, with DNR serving as the lead. It also involves federal agencies, industry, local communities, environmental organizations and the public.

DNR researches and analyzes social, economic, environmental, geological and geophysical information about a sale area and develops a preliminary best interest finding. The preliminary finding describes the sale area and discusses the potential effects that may occur as a result of oil and gas exploration, development, production and transportation. It also contains mitigation measures to be imposed as plans of operation permit terms designed to reduce or eliminate these effects. The preliminary finding is published approximately nine months before the sale and is followed by a public comment period of at least 60 days. During the public comment period, DNR may conduct workshops or hold public meetings in one or more of the affected communities. Local boroughs and municipalities may also conduct hearings, which division personnel will attend. Comments received during the comment period help in developing a final finding that includes a decision as to whether or not the sale is in state's best interests. DNR releases the final finding and decision at least 90 days before a scheduled sale.

Concurrent with a best interest finding, DNR analyzes a proposed lease sale for consistency with the Alaska Coastal Management Program (ACMP) and the local coastal management plans. The ACMP consistency analysis is published with the preliminary finding; the final ACMP consistency determination is issued concurrently with the final finding

**A Finding is Not Required:** Approximately nine months before a sale, DNR issues a "Call for Comments" requesting any substantial new information that has become available since the most recent finding for that region was completed. Based on the information received, DNR determines whether or not it is necessary to issue a supplement to the finding. DNR then issues either a supplement or a decision that there is no new information requiring a supplement 90 days prior to a sale.

Mitigation measures from earlier leases will be carried forward to all future sales unless DNR deems it necessary to change some of the measures or add additional ones. A new coastal management consistency review will be done whenever the commissioner determines that new information or conditions suggest a proposed lease sale may no longer be consistent with ACMP standards.

(When Finding is Not Required)

## **LEASING METHODS AND EXPLORATION INCENTIVE CREDITS**

### **Leasing Methods:**

Alaska has several leasing method options designed to encourage oil and gas exploration and maximize state revenue. These methods include combinations of fixed and variable bonus bids, royalty shares and net profit shares. Minimum bids for state leases are generally \$5 to \$10 per acre, but some have been set higher, and others have been reduced to \$0. Fixed royalty rates are generally 12-1/2 percent or 16-2/3 percent, although others have been as high as 20 percent. Lease terms are set at 7 or 10 years, depending on geographical location.

### **Exploration Incentive Credits (EIC):**

**AS 38.05.180(i):** This statute authorizes the Commissioner of Natural Resources to establish an EIC system under which a lessee drilling an exploratory well on state-owned land may earn credits based upon the footage drilled and the region in which the well is located. Drilling information is held confidential for two years. If demonstrated by the lessee as necessary, confidentiality may be extended. The statute also provides for an EIC for geophysical work on state land, if that work is performed during the two seasons immediately preceding an announced lease sale and is on land included within the sale area. The geophysical information must then be made public following the sale. Credits are granted by the commissioner for a limited period and may be assigned. A credit may not exceed 50 percent of the cost of the drilling or geophysical work. Credits may be applied against royalty and rental payments to the state, or taxes payable under AS 43.55. Amounts due the Alaska permanent fund (AS 37.13.010) are considered before the application of credits.

Since the state began offering EICs under this program twenty exploratory wells qualifying for credit have been drilled on state leases. Lessees have claimed credits totaling approximately \$54.7 million. Cost data for all twenty EIC wells are summarized in the table on page 13. To date there have been no applications for geophysical EICs.

**AS 41.09.010:** This second program was adopted in 1994, and allows the Commissioner of Natural Resources to grant an EIC for exploratory drilling, the drilling of a stratigraphic test well and for geophysical work on land in the state, regardless of whether the land is state-owned. This program is designed to encourage oil and gas exploration within remote parts of the state and to provide a means for the state to obtain exploration data from federal lands and certain private lands. As with the first program, credits may be applied against oil and gas royalties and rentals payable to the state, or taxes payable under AS 43.55, or they may be assigned. Data derived from drilling will be kept confidential for two years, but no extensions are allowed. Copies of geophysical data may be shown to interested parties by the state but may not be transferred to third parties. Credits may be as high as 50 percent of eligible costs if performed on state land, and as high as 25 percent of eligible costs if performed on private or federal land. A credit may not exceed \$5 million per eligible project, and the total of all credits issued under this program may not exceed \$30 million. Drilling credits are based upon the footage drilled. All activity qualifying for this EIC must be completed by July 1, 2004.

To date, no EICs have been granted under this program.

# **QUALIFYING TO APPLY FOR, OBTAIN, OR TRANSFER AN INTEREST, PERMIT OR LEASE RELATING TO OIL AND GAS IN ALASKA**

## **Who Must File**

Every individual, association or partnership, corporation, or person authorized to act on behalf of another party must qualify with the Division of Oil and Gas prior to bidding for lease tracts. Qualification must also be obtained prior to applying for, obtaining, or transferring interest in a permit or lease issued under AS 38.05.135 - 38.05.184.

## **Where to File**

Address any required information or inquiries regarding qualifications to State of Alaska, Department of Natural Resources, Division of Oil and Gas, 550 West 7<sup>th</sup> Avenue, Suite 800, Anchorage, Alaska 99501-3510. Hand-carried material should be delivered to the same address.

## **How to File**

The following is a list of the information and documents required when qualifying under 11 AAC 82.200 - 11 AAC 82.205. Information and documents that have been filed previously and are still current may be sufficient to qualify individuals or other entities.

### **A. Individuals**

Individuals must submit a signed, dated statement that includes the applicant's name, address, telephone number, preferably notarized, attesting that:

The individual has reached the age of majority (in Alaska the age of majority is 18 years, except for those who are emancipated earlier by marriage or by court order).

Forms may be obtained from the division upon request or a statement including the necessary information may be composed and submitted by an individual.

Any legal representative, guardian, or trustee for an individual must submit a certified copy of the court order authorizing the representative to act in that capacity and to fulfill, on behalf of the individual, all obligations arising under the lease or permit. The representative must also submit a signed statement as to the age of the individual and themselves (11 AAC 82.205(a)(2)).

Agents for an individual must submit an original or certified copy of a notarized power of attorney instrument authorizing the agent to act on behalf of the individual.

### **B. Corporations**

Corporations must submit:

- 1) the current address of the corporation,

- 2) a list of the individuals authorized to act on its behalf with respect to oil and gas leasing or permitting,
- 3) an original or certified copy of a notarized power of attorney authorizing any agent who is not a current officer but who has been authorized by the corporation to act on its behalf with respect to the mineral specified in the permit or lease,
- 4) a Certificate of Compliance for those corporations qualified to do business in Alaska,

-or-

- 5) if filing for the first time, either a Certificate of Incorporation from those corporations which have been incorporated in the state of Alaska (also known as “domestic” corporations), or a Certificate of Authority from those corporations which have been incorporated outside the state of Alaska (also known as “foreign” corporations).

These documents may be obtained from:

Alaska Department of Commerce and Economic Development  
Division of Banking, Securities and Corporations  
Attention: Corporations Section  
9th Floor, State Office Building  
P. O. Box 110807  
Juneau, AK 99811-0907  
(907) 465-2530

-or-

Alaska Department of Commerce and Economic Development  
Division of Banking, Securities and Corporations  
3601 C Street, Suite 724  
Anchorage, AK 99503-5986  
(907) 269-8140

Inquiries about incorporating in the state of Alaska, or qualifying as a foreign corporation to do business in the state of Alaska should be addressed to personnel at either of the above addresses.

### C. Unincorporated Associations

Unincorporated Associations must submit

- 1) a statement describing the business relationships between members of the association or partnership,
- 2) a statement of qualifications for each member of the association or partnership (outlined in Section A),

-and/or-

if some or all of the members are incorporated entities, all information required for corporations (described in Section B) must also be submitted, and

- 3) in the case of an agent acting on behalf of an individual, an original or certified copy of a notarized power of attorney defining the agent's authority to sign with respect to the mineral specified in the permit or lease on behalf of the partnership or association.

If still current, material previously filed with the department satisfying all or part of the requirements of this section may be incorporated in an application by appropriate reference together with a statement as to any material changes or amendments.

**Sources**

**Further Information**

Should you have any further questions regarding qualifying for Alaska oil and gas leases, please contact Alaska Division of Oil and Gas, 550 West 7<sup>th</sup> Avenue, Suite 800; Anchorage, Alaska 99501-3510. Phone number (907) 269-8816.

## **EXPLORATION LICENSING**

**E**xploration Licensing supplements the state's oil and gas leasing program and encourages oil and gas exploration within remote areas of the state outside of the known oil and gas provinces -- the North Slope coastal plain, Beaufort Sea and Cook Inlet. The holder of an exploration license has the exclusive right to explore an area between 10,000 and 500,000 acres in size for a term of up to 10 years. Rather than an up-front bonus payment to the state, as is done in conventional leasing, a licensee must commit direct expenditures for exploration. If there is competition for a license, the party committing the most dollars to exploration is granted a license. Since there are no annual rental payments for a license, the only money guaranteed the state is a \$1 per acre licensing fee, which is paid upon acceptance. The state is, however, provided all of the geological and geophysical information acquired by the licensee, and so can acquire a better understanding of an area's resource potential.

Once the work commitment is met, the licensee may convert all or a portion of the license area into oil and gas leases. Upon conversion the lessee begins paying the state annual rental fees of \$3 per acre. Should exploration lead to development and production, the state is entitled to a royalty share that cannot be less than 12.5 percent.

### **PROPOSED EXPLORATION LICENSES**

#### **Susitna Valley**

During April 2000 Forcenergy Inc. (now, Forest Oil Corp.) submitted two license proposals located between Petersville and Willow, west of the Susitna River. A competing proposal submitted in July was later withdrawn. Area 1 consists of approximately 399,360 acres, and Area 2 consists of approximately 474,420 acres. The Division issued the Preliminary Best Interest Finding for the two licenses in April 2001. The final finding and director's decision whether to grant the licenses will be issued during the first quarter of 2002.

#### **Nenana Basin**

During April 2001, Andex Resources, L.L.C. submitted a license proposal for 499,400 acres in the Nenana basin, located west and north of the town of Nenana. There were no competing proposals. The division will be issuing a Preliminary Best Interest Finding in February 2002. This will be followed by a 60-day public comment period. The final finding is scheduled to be issued by late summer.

ADNR 12/01

## SHALLOW NATURAL GAS LEASING

Alaska's Shallow Natural Gas Leasing Program is designed to encourage the development of local sources of gas from underdeveloped areas of the state. The Division of Oil and Gas is authorized to issue non-competitive leases for the exploration and development of shallow natural gas reservoirs, including coal-bed methane, located within 3,000 feet of the surface.

To encourage participation, no bonus payment is required and the annual rental payments are set at \$0.50 per acre. Lease terms are for three years with automatic extensions for as long as production continues. The royalty rate payable to the state was set at 6.25 percent unless production is in direct competition with other gas; in which case the royalty rate is 12.5 percent. A shallow natural gas lease contains up to 5,760 acres (nine square miles), and a single lessee may not hold more than a total of 46,080 acres (two townships) under this program. The leasing of state lands for the purpose of exploring for and producing shallow natural gas is exempt from a best interest finding.

Because a shallow natural gas lease excludes exploration below 3,000 feet, the \$1 million financial responsibility bond required for conventional oil and gas leases has been reduced to \$25,000. All other DNR and AOGCC bonding requirements remain the same.

If a shallow natural gas well penetrates a formation capable of producing from below 3,000 feet, or penetrates a formation capable of producing oil, operations must cease until the lessee complies with all applicable laws and regulations relating to conventional oil and gas exploration and production.

Lands subject to an oil and gas exploration license, or included in the state's Five-Year Oil and gas Leasing Program are not eligible for a shallow natural gas lease. Additionally, if land is held under a coal lease, only the coal lessee may apply for a shallow natural gas lease on those lands.

### Recent Activity

The division received 194 applications for leases in the Mat-Su Valley and Kenai Peninsula during 2000 and 4 applications for leases in the Delta Junction area during 2001, bringing in a total of \$99,000 in lease application fees. None of these leases have been issued at this time.

**NORTH SLOPE FOOTHILLS AREAWIDE**

Proposed Sale Area

<b>North Slope Foothills Areawide Lease Sales</b>	<b>Areawide 2002</b>	<b>May</b>	<b>2002</b>
	<b>Areawide 2003</b>	<b>May</b>	<b>2003</b>
	<b>Areawide 2004</b>	<b>May</b>	<b>2004</b>
	<b>Areawide 2005</b>	<b>May</b>	<b>2005</b>
	<b>Areawide 2006</b>	<b>May</b>	<b>2006</b>

**Description of Sale Area:** These five areawide sales will consist of all unleased, state-owned lands lying between the National Petroleum Reserve-Alaska (NPRa) and the Arctic National Wildlife Refuge (ANWR), south of the Umiat Baseline and north of the Gates of the Arctic National Park and Preserve. The gross proposed sale area is in excess of 7,000,000 acres and is divided into 1392 tracts. A significant amount of acreage within the sale area has only been selected by the state under the Alaska State Act. Certain ANCSA native village and regional corporations have also selected this acreage. The ultimate availability of this acreage for leasing by the state will depend on the outcome of the Bureau of Land Management's adjudication of the competing selections.

**Hydrocarbon Potential:** Hydrocarbon potential in the area is considered low to moderate.

**Other Resource Issues:** Four caribou herds utilize the proposed sale area: the Western Arctic Herd, Central Arctic Herd, the Teshekpuk Lake Herd and the Porcupine Caribou Herd. Caribou use the proposed sale area as winter range and travel along the river drainages and mountain passes to their summer calving areas along the Beaufort Sea coast.

The riparian habitats found within the sale area are important to a variety of species such as moose, grizzly bears, and arctic peregrine falcons. Some of the higher mesa or butte areas are used for lambing and mineral licks by Dall sheep. Major river valleys, where willow stands are most abundant, provide valuable moose habitat. Moose concentrate in these areas throughout the year, with peak use occurring during winter. Grizzly bears are frequently associated with riparian habitats in the area, especially in the spring and fall. Arctic peregrine falcons nest along several of the rivers in the proposed sale area. Residents of Anaktuvuk Pass are the most frequent users of fish and wildlife in the sale area; however, Barrow and Nuiqsut residents occasionally harvest species in the area.

**Community Information:** Portions of the proposed sale area lie within the boundaries of the North Slope Borough Coastal Management District. Oil and gas activities in this area of the state's coastal zone must be consistent with the Alaska Coastal Management Program, which includes the borough's program. The North Slope Borough has adopted a Comprehensive Plan and Land Management Regulations that may impose restrictions on oil and gas activity in the proposed sale area.

<u>Community</u>	<u>Municipal Classification</u>	<u>Population (1998)</u>
North Slope Borough	Home rule borough	9,389
Prudhoe Bay/Deadhorse	Unincorporated	25
Nuiqsut	Second class city	459
Anaktuvuk Pass	Second class city	308

**Status of Sale:** No decision has been made on whether these sales will be held. Approximately nine months prior to each proposed lease sale the division will issue a request for new information that has become available since the original finding was issued in February 2001. Should the director determine that, based on new information, a supplement to the finding is justified, the supplement, along with the director's decision, will be issued at least 90 days before each

STATE OF ALASKA  
 DEPARTMENT OF NATURAL RESOURCES  
 DIVISION OF OIL AND GAS

**COOK INLET AREAWIDE**

Proposed Sale Area  

<b>Cook Inlet Areawide Lease Sales:</b>	<b>Areawide 2002</b>	<b>May</b>	<b>2002</b>
	<b>Areawide 2003</b>	<b>May</b>	<b>2003</b>
	<b>Areawide 2003</b>	<b>May</b>	<b>2004</b>
	<b>Areawide 2005</b>	<b>May</b>	<b>2005</b>
	<b>Areawide 2006</b>	<b>May</b>	<b>2006</b>

**Description of Sale Areas:** These five areawide sales will include unleased, state-owned uplands located in the Matanuska and Susitna Valleys, the Anchorage Bowl, the western and southern Kenai Peninsula from Pt. Possession to Anchor Pt., as well as on the western shore of Cook Inlet from the Beluga River to Harriet Pt. These sales will also include the tide and submerged lands in the upper Cook Inlet from Kink and Turnagain Arms south to Anchor Pt. and Tuxedni Bay. The area is bounded on the east by the Chugach and Kenai Mountains and on the West by the Aleutian Range. The gross proposed area is about 4,200,000 acres and is divided into 815 tracts. However, the actual number of tracts available for leasing will not be known until 90 days before a sale.

**Hydrocarbon Potential:** Hydrocarbon potential in the area is considered low to moderate.

**Other Resource Issues:** The Cook Inlet region is used extensively for commercial, subsistence, and recreational fishing and hunting. Five species of North Pacific salmon are fished commercially throughout Cook Inlet. A number of important anadromous streams are found within the proposed sale area. The area provides important habitat for moose, black and brown bear, caribou, and waterfowl. Marine mammals found near or within the area include beluga whales, Steller sea lions, sea otters and harbor seals. Protected or endangered species known to occur in the sale area include the bald eagle. Under the Endangered Species Act, the Steller sea lion is a threatened species east of 144 degrees longitude and endangered west of 144 degrees longitude.

A number of state and federal wildlife refuges, critical habitat areas, recreation areas, and parks exist within or near the proposed sale area. These areas encompass important fish and wildlife habitat, and have significant scenic and recreational value.

**Community Information:** The proposed sale area is within the boundaries of two boroughs and the Municipality of Anchorage. The Matanuska-Susitna Borough, the Kenai Peninsula Borough, and the Municipality of Anchorage all have approved coastal management plans that are included in the Alaska Coastal Management Program.

**NORTH SLOPE AREAWIDE**

Albers Equal-Area Conic Projection Based On The Clark 1866 Ellipsoid Central Meridian: -150.00 Origin Latitude: 50.00

Proposed Sale Areas

<b>North Slope Areawide Lease Sales:</b>	<b>Areawide 2002</b>	<b>October 2002</b>
	<b>Areawide 2003</b>	<b>October 2003</b>
	<b>Areawide 2004</b>	<b>October 2004</b>
	<b>Areawide 2005</b>	<b>October 2005</b>
	<b>Areawide 2006</b>	<b>October 2006</b>

**Description of Sale Area:** These five proposed areawide sales consist of all unleased, state-owned lands lying between the National Petroleum Reserve-Alaska (NPR) and the Arctic National Wildlife Refuge (ANWR), and from the Beaufort Sea in the north to the Umiat Meridian Baseline in the south. The proposed area contains as much as 5,100,000 acres and is divided into 1225 tracts. However, the actual number of tracts available for leasing will not be known until 90 days before a sale. The sale area also includes unleased lands within the area of the 1991 settlement agreement between the Arctic Slope Regional Corporation (ASRC) and the state of Alaska. As a result of this agreement, a portion of the subsurface estate along the Colville River is owned jointly by the state and ASRC.

**Hydrocarbon Potential:** Hydrocarbon potential in the area is considered moderate to high.

**Other Resource Issues:** The proposed sale area supports a variety of wildlife. Caribou from the Central Arctic Herd and the Teshekpuk Lake Herd utilize parts of the region. Grizzly bears and moose are found along the Colville and Itkillik rivers. Polar bear dens have been documented in the Colville River Delta. Spotted seals haul out on sand bars in the Colville River Delta. Arctic fox, wolverine, and wolves also inhabit the area. Millions of birds migrate through or near the area during the summer, stopping to feed or rest on the numerous small tundra ponds typical of the area. The Colville River Delta wetlands provide important staging, nesting, feeding, and molting habitat for many species of birds. Freshwater fish include grayling, burbot, and whitefish. Anadromous fish include arctic char, cisco, whitefish, and salmon. Residents of Nuiqsut and Anaktuvuk Pass use the area for fishing and hunting birds, caribou, and other species.

**Community Information:** Portions of the proposed sale area lie within the boundaries of the North Slope Borough Coastal Management District. Oil and gas activities in this area of the state's coastal zone must be consistent with the Alaska Coastal Management Program, which includes the borough's program. The North Slope Borough has adopted a Comprehensive Plan and Land Management Regulations that may impose restrictions on oil and gas activity in the proposed sale area.

	<b>Areawide 2003</b>	<b>October 2003</b>
	<b>Areawide 2004</b>	<b>October 2004</b>
	<b>Areawide 2005</b>	<b>October 2005</b>
	<b>Areawide 2006</b>	<b>October 2006</b>

**Description of Sale Area:** The area for these five proposed sales consists of all unleased state-owned tide and submerged lands lying between the Canadian Border and Point Barrow, and some coastal uplands acreage located along the Beaufort Sea between the Staines and Colville Rivers. The gross proposed sale area is in excess of 2,000,000 acres and is divided into 576 tracts. However, the actual tracts available for leasing will not be known until 90 days before each sale. A portion of the subsurface estate offshore of the mouth of the Colville River is owned jointly by the state of Alaska and the Arctic Slope Regional Corporation. The boundary lines between state waters and those within the National Petroleum Reserve – Alaska and the Arctic National Wildlife Refuge have yet to be agreed upon by agencies within the U.S. Department of the Interior. Some tracts may need to be reconfigured.

**Hydrocarbon Potential:** The hydrocarbon potential in the area is considered moderate to high.

**Other Resource Issues:** The marine environment along the Beaufort Sea coast provides denning habitat for polar bears and pupping habitat for ringed seals. Bowhead whales occur in the proposed sale vicinity during the fall migration, and a bowhead whale feeding area has been documented in the Demarcation Point vicinity. Beluga whales may also be found in the general vicinity during the summer. Numerous species of waterfowl, shorebirds, and seabirds migrate along the Beaufort Sea, and nest, stage, and molt in the lagoonal areas. Nearshore waters provide habitat for many marine and anadromous fish species. Caribou, grizzly bear and moose are found along major rivers. Residents of Barrow, Nuiqsut and Kaktovik use the fish and wildlife resources in the area for subsistence. The fall and spring hunts for bowhead whales are especially important to their subsistence needs.

**Community Information:** The proposed sale area lies within the boundaries of the North Slope Borough Coastal Management Program. Oil and gas activities in these areas of the state’s coastal zone must be consistent with the Alaska Coastal Management Program, which includes the borough’s program. The North Slope Borough has adopted a Comprehensive Plan and Land Management Regulations that may impose restrictions on oil and gas activity in the proposed sale area.

<u>Community</u>	<u>Municipal Classification</u>	<u>Population (1998)</u>
