

EXPLORATION LICENSING

Exploration Licensing supplements the state's oil and gas leasing program and encourages oil and gas exploration within remote areas of the state outside of the known oil and gas provinces -- the North Slope, Beaufort Sea and Cook Inlet. The holder of an exploration license has the exclusive right to explore an area between 10,000 and 500,000 acres in size for a term of up to 10 years. Rather than an up-front bonus payment to the state, as is done in conventional leasing, a licensee must commit direct expenditures for exploration. If there is competition for a license, the party committing the most dollars to exploration is granted a license. Since there are no annual rental payments for a license, the only money guaranteed the state is a \$1 per acre licensing fee, which is paid upon acceptance. The state is, however, provided all of the geological and geophysical information acquired by the licensee, and so can gain a better understanding of an area's resource potential.

Once the work commitment is met, the licensee may convert all or a portion of the license area into oil and gas leases. Upon conversion the lessee begins paying the state annual rental fees of \$3 per acre. Should exploration lead to development and production, the state is entitled to a royalty share that cannot be less than 12-1/2 percent.

Five-Year Licensing Program

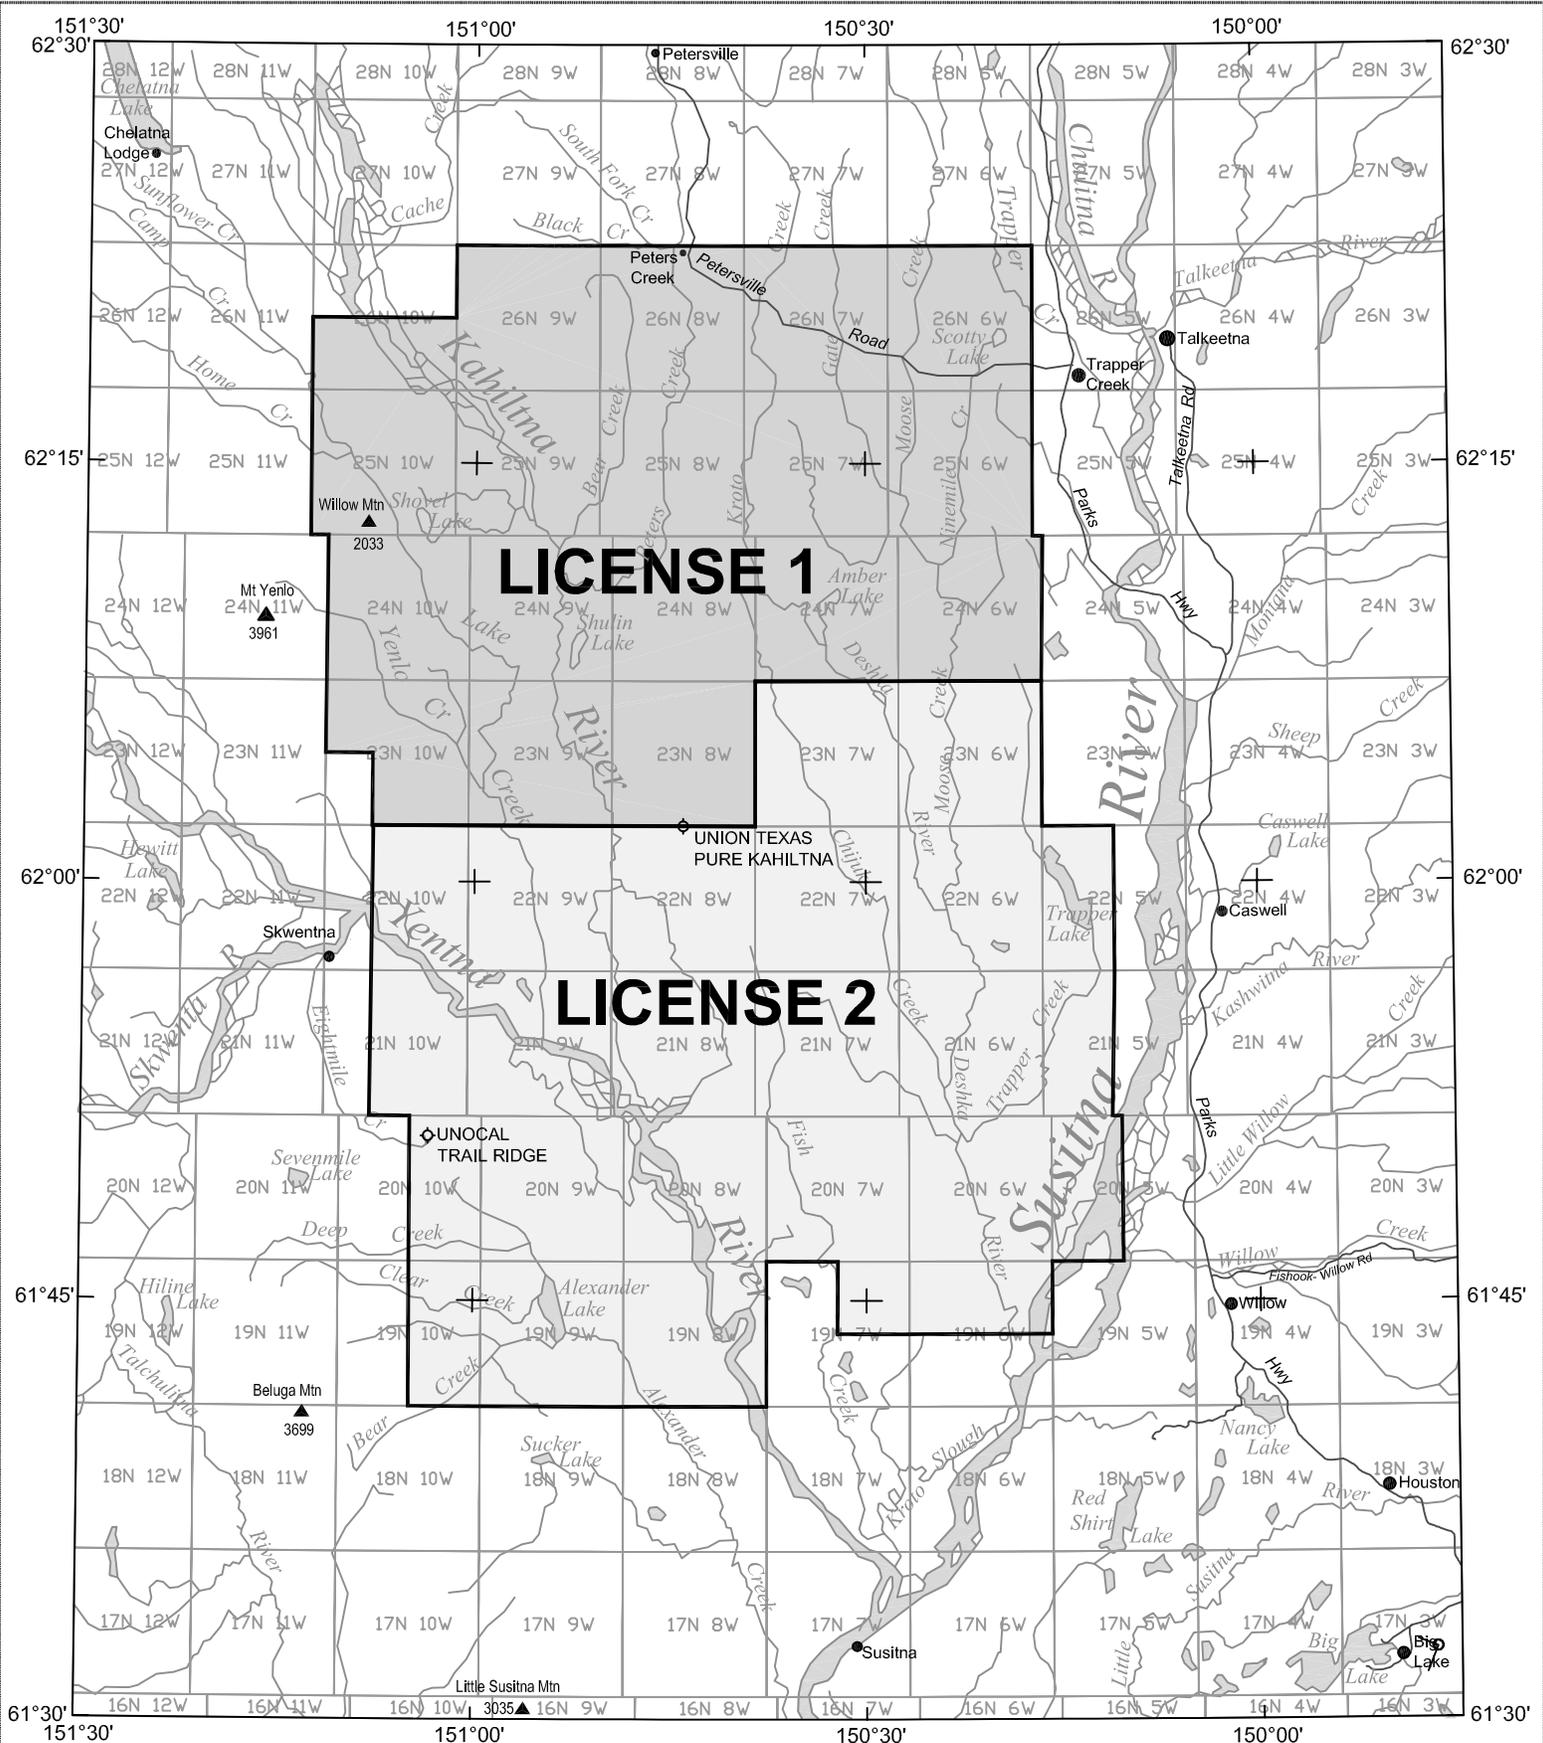

Through 2007 the department does not intend to solicit licensing proposals for specific areas. Rather, the department will accept all proposals for consideration that are submitted during the month of April of each year, as specified in 11 AAC 82.909. Areas not eligible for licensing are specified in AS 38.05.131.
