**SALE ANNOUNCEMENT
NORTH SLOPE AREAWIDE 2013W
COMPETITIVE OIL AND GAS LEASE SALE**

The Alaska Department of Natural Resources (ADNR), Division of Oil and Gas (DO&G), gives notice under AS 38.05.945(a)(4) that it will offer lands for competitive oil and gas leasing in the North Slope Areawide 2013W Oil and Gas Lease Sale (NS 2013W sale).

Bid acceptance will be 9:00 a.m. to 4:00 p.m. on November 4, 2013, at 550 West 7th. Ave., Suite 800, Anchorage.

Bid opening will begin at 9:00 a.m. on November 6, 2013, at the Dena'ina Civic and Convention Center, located at 600 W. 7th Avenue, Anchorage.

The North Slope Areawide sale area encompasses approximately 5.1 million acres that are divided into 1,225 tracts ranging in size from 640 to 5,760 acres. These tracts are located entirely within the North Slope Borough between the Canning River and Arctic National Wildlife Refuge (ANWR) on the east and the Colville River and National Petroleum Reserve-Alaska (NPR-A) on the west. The southern boundary of the sale area is the Umiat baseline. The northern fringe of the sale area is set back from the Beaufort Sea to exclude any tide or submerged lands. The sale area is divided into three sub-regions: North, South and Adjacent to Federal Lands (the NPR-A and the ANWR). The sale area contains acreage owned by the State of Alaska (state) and Arctic Slope Regional Corporation (ASRC). Activities resulting from this sale may affect the communities of Barrow, Nuiqsut, Kaktovik, and Deadhorse.

Sub-Regions and Tract Size

Each of the sub-regions within the North Slope Areawide has different sale terms. Each sub-region (North, South, and Adjacent to Federal Lands) has an Attachment A that lists the tracts, minimum bid per acre, royalty rate to the state, and the primary term of the lease. The Attachment A's are available on the division's website: <http://dog.dnr.alaska.gov/Leasing/PreviousSales.htm>. Because of the varying terms for each region, bidders should read the "Instructions to Bidders" and Attachment A's completely before preparing and submitting a bid(s).

For the NS 2013W lease sale, all 9-section tracts (which are approximately 3 miles by 3 miles) within the North and South sub-regions are subdivided into four parcels (A, B, C, and D). For instance, most 9-section tracts have an estimated acreage of 5,760 acres; therefore, each parcel (A, B, C, and D) within the tract will have an estimated acreage of 1,440 acres for determining the minimum bonus bid calculations for the bid form.

The DO&G will prepare a regional tract map that displays the location of all tracts within the lease sale area. Only state-owned lands and lands jointly owned by the state and ASRC that will be available before **September 8, 2013** may be leased in the NS 2013W sale. Lands that are conveyed to the state or that become available on or after that date may be offered in a future North Slope Areawide sale.

The regional tract map will not show detailed land ownership or land under lease. **Bidders are cautioned to verify state title or land available for leasing within the tracts prior to bidding. Verification of active leases within a township, range, section, and meridian can be found using the right side of the page at the following link: <http://dnr.alaska.gov/projects/las/lasmenu.cfm>. The regional tract map will not be released until after September 15, 2013.**

Bidders may bid on only one sale tract number and parcel letter per bid form.

The exact amount of the net leaseable acreage in each tract will not be determined unless a bid is received for the tract. Following the sale, the DO&G will complete a comprehensive evaluation of the lands within the tracts that received bids to determine what lands are available for lease. This process may take several months to complete. Acreage not owned by the state, already subject to an oil and gas lease, clouded by title claims, subject to pending litigation, or otherwise determined to be unavailable for leasing will not be leased.

State/ASRC Acreage

The state and ASRC executed a Settlement Agreement in 1991 (State/ASRC Settlement Agreement). In that agreement, the state and ASRC agreed to joint ownership for the purposes of oil and gas leasing within the settlement area. The boundary of the State/ASRC Settlement Agreement is shown on the regional tract map for the NS 2013W sale. Any tracts containing jointly owned acreage determined to be available before **September 8, 2013** will be included in the NS 2013W sale.

For tracts that contain acreage within the settlement area, DO&G may issue more than one lease to comply with the State/ASRC Settlement Agreement. The leaseable acreage and number of leases for each tract will be determined during the DO&G's title and survey review after the sale.

Tract Deletions and Deferrals

DO&G has deferred leasing tracts 997, 1007, 1008, 1189, 1195, 1196, 1199, 1222 and 1225. Deferral means that these tracts will not be offered for lease in this sale, but may be included in future lease sales. DO&G will annually review the available information for these tracts to determine whether to offer these tracts in future lease sales.

DO&G reserves the right to delete or defer any additional acreage or tracts from the sale at any time prior to issuance of the lease. Bids will not be accepted on deferred or deleted tracts and will not be opened. Please check Attachment A at <http://dog.dnr.alaska.gov/Leasing/PreviousSales.htm#nslope> for updates to the deferred list.

Best Interest Finding

The NS 2013W sale is being held under Alaska Statute (AS) 38.05.180(w). Under this provision, DO&G may immediately offer for lease land that was previously subject to a best interest finding issued within the previous 10 years upon terms appearing most advantageous to the state.

In support of a North Slope Areawide lease sale, DO&G issued a written final finding and decision under AS 38.05.035(e) and (g) on July 15, 2008. The decision set forth the facts, policies, and applicable laws upon which a determination was made that oil and gas lease sales on the North Slope of Alaska will best serve the interests of the state. The North Slope Areawide final best interest finding is available on the DO&G website at <http://dog.dnr.alaska.gov/Leasing/BestInterestFindings.htm#nslope>, at the DO&G office in Anchorage, and at the locations listed under Sale Information below.

Decision of No Substantial New Information

On March 22, 2013 the DO&G issued a Call for Substantial New Information for the NS 2013W sale. Based on the information received, the ADNR issued a Decision of No Substantial New Information on July 1, 2013.

Mitigation Measures

AS 38.05.035(e) and the departmental delegation of authority give the director of the DO&G the authority to impose conditions or limitations in addition to those required by law to ensure that the disposal best serves the interests of the state. To meet this requirement, the director has adopted environmental and social mitigation measures that stay in effect throughout the duration of the lease. These mitigation measures are necessary to protect biological, cultural and archeological resources, and to mitigate social impacts of lease-related activities. The DO&G will condition plans of operation, exploration, and other permits based on these mitigation measures, and additional restrictions may be imposed through the permitting process. In addition, the lessee must obtain all the necessary federal, state, and local permits and approvals required by law or regulation before conducting the proposed activity.

Notice to Bidders

Lessees must adhere to all federal requirements for marine mammals and endangered species, including Section 7 consultations with the USFWS, which may be required prior to initiation of activities in the lease sale area.

Bidding Method

Cash bonus bidding on all tracts.

Adjacent to Federal Land sub-region – minimum bid \$10.00/acre.

North and South sub-regions – minimum bid \$25.00/acre.

Note: Under 11 AAC 82.445, a bid will not be considered unless supported by the bid deposit and the information required in the “Instructions to Bidders”, unless any omission is determined by the commissioner or his designee to be immaterial or due to excusable inadvertence, and the omission is corrected within one week following receipt of a notice of deficiency.

Primary Term of Lease

All tracts – 10 years.

Royalty Rates

South and Adjacent to Federal Land sub-regions – a fixed royalty rate of twelve and one-half percent (12.5%).

North sub-region – a fixed royalty rate of sixteen and two-thirds percent (16.66667%).

Annual Rental

Adjacent to Federal Land sub-region – Year 1, \$1.00/acre; Year 2, \$1.50/acre; Year 3, \$2.00/acre; Year 4, \$2.50/acre; Years 5+, \$3.00/acre.

North and South sub-regions – Years 1-7, \$10.00/acre; Years 8+, \$250.00/acre; except that beginning in the year after the year in which sustained production commences on the lease or the state otherwise determines in its sole discretion, upon request, that the lessee has exercised reasonable diligence in exploring and developing the lease the annual rental will be \$10.00 per acre or fraction of an acre. In evaluating a request to decrease rental based on the exercise of reasonable diligence, the state will consider the funds expended by the lessee to explore and develop the lease and the types of work completed by or on behalf of the lessee on the lease.

Lease Forms

Tracts Adjacent to Federal Land in the NPR-A, and ANWR – Leases will be executed on Competitive Oil and Gas Lease Form # DOG 201308.

All other tracts – Leases will be executed on Form # DOG 201308W.

Leases on State/ASRC acreage will be executed on Form # DOG 201308W AS.

Sample lease forms are available on the DO&G website at:

<http://dog.dnr.alaska.gov/Leasing/LeaseSales.htm>

Bonding

Before beginning lease operations, an oil and gas lease bond is required under 11 AAC 83.160. Alternatively, a statewide oil and gas lease bond of a minimum of \$500,000 for operations conducted on more than one lease may be filed. These bonding provisions do not affect the commissioner's authority to require additional unusual-risk bonds as may be necessary. In addition, the Alaska Oil and Gas Conservation Commission requires a bond of at least \$100,000 for a single well or a bond of at least \$200,000 to cover wells statewide before drilling operations will be permitted by that entity (20 AAC 25.025). Additional bonding may be required under 11 AAC 82.465, 11 AAC 82.600, 11 AAC 83.390 and 11 AAC 96.060.

Sale Information

Complete details regarding the NS 2013W sale, including the following documents, are on the DO&G website at <http://dog.dnr.alaska.gov/Leasing/LeaseSales.htm>:

- Sale Announcement
- Mitigation Measures
- Instructions to Bidders with estimated tract acreage figures (Attachment A)
- Bid Form
- Final Finding (July 2008) and Supplements (July 2010; July 2011)

- Decisions of Substantial New Information (July 2010; July 2011)
- Decision of No Substantial New Information (July 2012, July 2013)
- Regional Tract Map (**Available after September 15, 2013**)
